

Fog generator with Li-Ion battery

Compact and lightweight

Reduced charging time

Made in Germany

The **Power-Tiny** is the strongest machine of the Tiny range. It completes the range of the battery-operated machines perfectly and fills the gap between high flexibility and powerful fog output.

Compared to the Power-Tiny with lead-acid-battery, the machine with the new **Lithium-Ion battery** is **lighter**, the **fogging time has been extended by two minutes** and the **battery charges faster**.

In the world of Theatre, Film-, TV- and Photoographie, Musicals and Special effects, air flow and tightness testing - wherever fog is needed quickly and efficiently, the **Power-Tiny** is the perfect alternative to „normal“ fog generators.

Features

- Minimal heat-up time

Due to the heat-up time of only one second, the **Power-Tiny** is ready to use on site.

- Low weight and small dimensions

The relatively low weight (3.3 kg) and the small dimensions (L = 22.3 cm; W = 10 cm; H = 19.5 cm) makes the machine useable for mobile uses.

- Adjustable output

The fog output can be adjusted with the adjusting knob that is installed in the lid.

The release button is built into the handle. Thus, a comfortable one-hand-operation is possible.

- Microprocessor controlled

The heart of the machine is a microprocessor which controls and supervises all important functions. This guarantees a continuous and safe running of the generator.

- New Lithium-Ion battery

The 12V-Lithium-Ion battery provides energy for 12 minutes of continuous output or up to 150 individual fog bursts of 5 seconds each.

- 250 hours stand-by time

Due to the intelligent control mechanism, the battery supplies energy only when necessary.

Thus the operation time is considerably increased - the stand-by time is 250 hours.

- Faster charging time

When the battery is empty, it can be recharged in just 4 hours using the charger included in the delivery.

The battery has a charge indicator that is activated at the touch of a button and displayed via LEDs.

To avoid long waiting times during recharging, a batterypack (battery equipped with housing, PCB, fuse, connecting cable) is available as an option.

The fog generator can easily be disconnected from the battery and connected to the new batterypack quickly.

Thus, the **Power-Tiny** is ready for operation immediately.

- Control

The fogging process is started with the release button in the machines handle.

The **Power-Tiny** is equipped with a 3pin-XLR-socket.

It can be used for an analogue (0 - 10V) cable remote or for a radio remote (both available as an option).

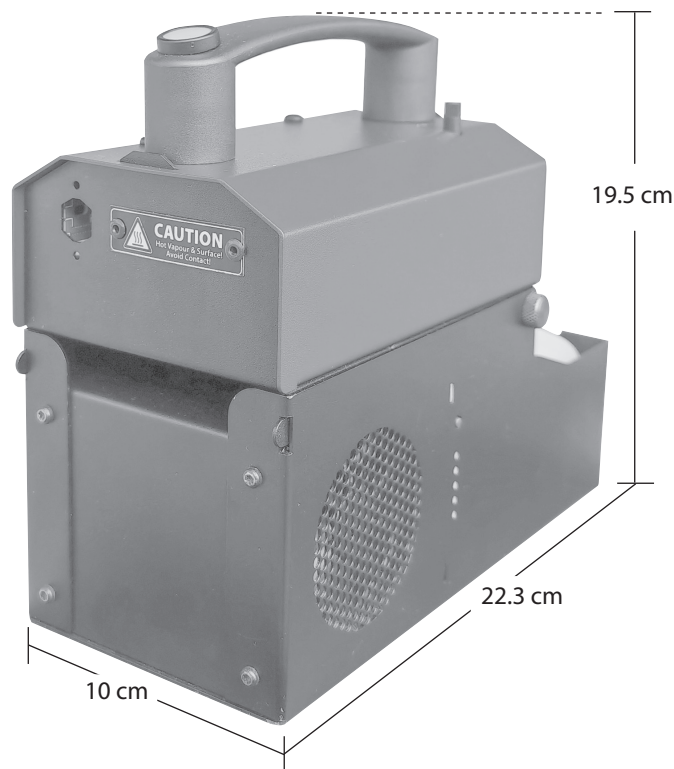

Also a DMX-converter to control the machine via DMX 512 or a timer is available.

With the timer a fog and wait time can be programmed in.

Specifications

Procedure	Vaporizing fog generator
Power requirement	400 Watt
Voltage	12 V with battery
Heat-up time	1 second
Fluid tank capacity	250 ml
Fluid consumption	10 ml/min. at cont. output
Fogging time	programmable
Continuous output with battery	approx. 12 minutes
Control	Start button Cable remote (option) Radio remote (option) DMX 512-converter (option) Timer (option)
Control/ Temperature control	Microprocessor
Dimensions (L x W x H)	22.3 x 10 x 19.5 cm (8.7 x 3.9 x 7.7 in)
Weight incl. battery	3.3 kg

Dimensions

Advantages

- Small dimensions and light weight
- Lithium-Ion battery with reduced charging time (4 hrs)
- Charge indicator
- The battery supplies energy only when necessary. Thus the operation time is considerably increased - the stand-by time is 250 hours.
- Heat-up time: 1 second
- Continuous output
- Output adjustable
- Triggered by button in the handle, optionally by cable remote, radio remote, DMX converter, or timer
- Low fluid consumption (10 ml/min. at cont. output)
- Production and Service in Germany

Package includes

- Power-Tiny (fog generator + Li-Ion battery pack)
- Charger
- Fluid tank 250 ml
- 250 ml Tiny-Fluid

Accessoires

- Cable remote (XLR-remote)
- Radio remote
- Schlauchblende
- Timeit, Timer
- DMXit, DMX-Konverter

Service

Based on the strong partnership with our manufacturer Look Solutions is able to provide a quick and easy service which guarantees the high quality of all products.
